

This is my latest LEMP dev build. It's carefully crafted after days of tweaking to include the following:

1. Ubuntu 14.04 LTS
2. NGINX 1.8.0
3. PHP 5.6 (latest, currently 5.6.9)
4. Ruby 2.2.2 (via RVM)
 1. Compass
 2. Sass
 3. Bundler
 4. CYAML
5. curl
6. openssl
7. xdebug
8. Composer

You can find it [here](#), be sure to update the variables in the bash script to your specific parameters.

Usage

```
cd /path/to/my_app
git clone https://github.com/litwicki/Litwicki-LEMP.git
/path/to/my_app
vagrant up
```
