

litwicki/common - <https://github.com/litwicki/common>

A set of helper functions and utilities with a wide variety of use.

## Utilities

- cURL class

## Helpers

- Several commonly used selection arrays for forms (month, year, country, state, etc)

## Install

```
$ composer require "litwicki/common"
```

## Usage

Build an array of states, keyed by abbreviation:

```
$ use LitwickiCommonCommon;  
$ $states = Common::getStateOptions();  
$ //$states['IL'] = 'Illinois'; //example
```

Build a cURL object..

```
$ use LitwickiCommoncURL;  
$ $curl = new cURL();  
$ $response = $curl->get('http://example.com');
```
