

This is partially self-serving as I've recently had to setup my new iMAC w/ 5k Retina, and also because as a mentor I'm frequently asked to help other developers get "setup" and I've yet to setup an aggregated list of things to install/setup. So, here is *that* list.

## Software (Free)

- [Vagrant](#)
- [Virtualbox](#)
- [Chef DevKit](#)
- [SublimeText3](#) (suggested \$60 license, but not required)
- [Google Chrome](#)
  - Postman
  - Colorpicker
  - Cookies
  - JSONView
  - XML Tree
- MAC OSX Applications
  - Memory Monitor
  - Wireless Signal
  - Disk Diag
  - Harvest
  - Evernote
  - iTerm2
  - xcode

## Software (Paid)

1. [jetBrains phpStorm](#)
2. [Postbox](#)

## Install [Homebrew](#) & Packages

```
ruby -e "$(curl -fsSL
https://raw.githubusercontent.com/Homebrew/install/master/install)"
brew install wget
brew install colordiff
brew install tig
brew install macvim
brew install gnupg
```

## Install [RVM](#)

```
gpg --keyserver hkp://keys.gnupg.net --recv-keys
409B6B1796C275462A1703113804BB82D39DC0E3
\curl -sSL https://get.rvm.io | bash -s stable
```

## Install [Composer](#)

```
curl -sS https://getcomposer.org/installer | php
mv composer.phar /usr/local/bin/composer
```

## Install [WP CLI](#)

```
curl -O
https://raw.githubusercontent.com/wp-cli/builds/gh-pages/phar/wp-cli.p
har
chmod +x wp-cli.phar
sudo mv wp-cli.phar /usr/local/bin/wp
```

## Install [Drush](#)

```
export PATH="$HOME/.composer/vendor/bin:$PATH"
```

```
composer global require drush/drush
```

## Install [Ansible](#) via [PIP](#)

```
sudo easy_install pip  
sudo pip install ansible
```

## Install [Vagrant](#) Plugins

```
vagrant plugin install ansible  
vagrant plugin install landrush
```
