

Admittedly, I have been meaning to read this for a long while, but have tempered myself because I am rapidly becoming a Simon Sinek fanatic and want to make sure I do not fall victim to my own personal bias.

However as much as I try, I cannot help sponging up the contents of [***Leaders Eat Last***](#) without hesitation. I find the book immeasurably valuable both as a leader and as a (technically) Millennial myself. The breakdowns of the generations and their strengths and shortcomings certainly generalizes quite a bit, but I nevertheless found it incredibly useful to get a general idea if nothing else.

Perhaps the most valuable anecdote I can share from the book is that **empathy** and **safety** are the two most important facets of leadership. A leader *must* provide a circle of safety and be empathetic to the people they are responsible for (see the clip below).

Why Organizations Need a Circle of Safety

Needless to say, I unequivocally recommend [***Leaders Eat Last***](#) book to *anyone*.
