Phone: 630-803-5467 Blog: jakelitwicki.com

I am a passionate architect, engineer and leader. I was taught you can do anything if you try, and to never quit, and I live and work by that every day. I believe in people, relationships, family, and doing the absolute best you can without excuses. Most importantly I believe in myself, and my ability to make those around me better at what they do by feeling empowered and rewarded by the work they do.

- Consistently manage multiple teams across multiple engineering initiatives; currently managing 3 teams of ~20 total direct reports, and an additional 10-15 offshore indirect reports.
- Regularly an innovator and driver of efficiency and improvement in engineering orgs; currently migrating all of SterlingTS to container driven end-to-end pipelines using Docker.
- Architected, engineered, and supported several applications/websites from idea to production on a variety of technology stacks from .NET, PHP, and recently migrating SterlingTS to SOA with NodeJS and Java/Kotlin.
